

Modulo 2

Git

Parches

- Generar un archivo con todos los cambios de la copia de trabajo actual:
 - `git diff > changes.patch`
 - `git format-patch $1..$2`
- Aplicar un archivo patch sobre una copia de trabajo:
 - `git apply changes.patch`
 - `patch -pnum < changes.patch`

```

Generar ssh-key para conectar a github

- › ssh-keygen -t ed25519 -C enriquegalan92@gmail.com
- › Seleccionar ubicación del archivo resultante
 - › Enter file in which to save the key (/home/mobaxterm/.ssh/id_ed25519):
/home/mobaxterm/.ssh/id_github_public
- › Por ahora evitar usar contraseñas
- › En la dirección <https://github.com/settings/ssh/new> colocaremos el contenido de nuestro id_github_public.pub

Corroborar conexión con github

- Desconectado de la vpn
- En ~/.ssh/config
 - › host github_public
 - › user git
 - › hostname github.com
 - › identityfile ~/.ssh/id_github_public
- En consola hacer “ssh github_public”
 - Hi EnriqueGalan92! You've successfully authenticated, but GitHub does not provide shell access.

Comandos de git

- › git init
- › git remote
 - › Add
 - › Remove
 - › update
- › git clone
- › git log
 - › Oneline
 - › Decorate
 - › graph
- › git show
- › git blame
- › git diff
- › git checkout
